### TASTING NOTES

"What? A beer that is both LOW CARB, and FULL of flavour? AND MADE BY EPIC?! Bringing the big hop aroma and flavour that Epic is renowned for, to a beer that is both low carb and tasty. Epic Blue, Epic You

#### Brewery Notes

We get it. Watching the carbs for an epic you. But there's no reason to compromise. Because its possible to have a great tasting beer while keeping those carbs under surveillance. When we noticed the increasing popularity of Low Carb beers we knew we needed to try and make the world a better place with beer. We're happy to announce that we have done it! You can thank us later. At a low 4.8% it's light, has a dry finish & is less filling but leaves just enough of the hop intensity to coat your tongue with deliciousness."
