TASTING NOTES

Brewery Notes

"It's time to level up our Hazy IPA offering. People have been loving the Epic Hazy orange cans so much they have asked us when are we going to do a six pack. Well the answer is, NOW! We have taken the best of all our Hazy IPA recipes over the last 12 months and we have "cranked up the juice". We had already spent two years researching and tasting all the hazy IPA's so we could come up with the ultimate recipe. We have also now brewed a bunch of different versions using different hop combinations over the last 18 months. We think that all the time and effort that has gone into making stunning Hazy IPA recipes will really show up in this beer. We have used an "Epic" amount of hops as you would expect from us. We got the biggest, juiciest, stickiest Citra, Mosaic and Simcoe hops we could find. A blend of T90 and Cryo hops to give the maximum desired aromas and flavours. It's like drizzling freshly squeezed passionfruit, mango and pineapple juice across your tongue. 5.3% alc/vol and a super low bitterness and maximum haze, will keep every Hazy-Head happy with being able to sit down and drink a few from the six pack. Share some with a friend. They will thank you for"
