TASTING NOTES

One of our favourite everyday beers. Nice and hoppy, full of tropical fruit flavour and so sessionable!

Brewery Notes

"Get those images of Godzilla and Mothra out of your head! I know you were thinking it, but this beer has nothing to do with Japan whatsoever. Yakima is actually a region in the state of Washington USA where some of my favourite hop varieties are grown. This monster of a pale ale showcases several of them. It's an easy drinking beer, flavoursome enough for your father 'n law to exclaim "Wow - that's fruity!" yet complex enough for any green blooded hop-head to appreciate. Enjoy this beer responsibly, at refrigeration temperature with your friends or family."
