Alcohol: 38.0%

TASTING NOTES

Becherovka, formerly Karlsbader Becherbitter, is a herbal bitters, often drunk as a digestive aid that is produced in Karlovy Vary, Czech Republic by the Jan Becher company. Becherovka is often described as having a gingery or cinnamon flavour. It is made from a secret recipe based on a wide variety of herbs and spices. It is usually served chilled, though some serve it with tonic water, making a drink called a beton (becherovka and tonic) which means "concrete" in Czech, German and several other languages.
